<b>AUTHORIZATION TO FILE DOCUMENTS INCORPORATED BY REFERENCE BY DESCRIPTION</b>	8/4/15 9:54a.m.

1 Agency: State Water Control Board

2 Regulation Numbers: VR VAC 9VAC25-91  
 Title of Regulation: Facility and Aboveground Storage Tank (AST) Regulation

3 Effective Date of Regulation: Nov. 1, 2015

4 Name of Document Incorporated by Reference:  
 American Petroleum Institute (API) Standard API 570: Piping Inspection Code, November 2009 "Inspection, Repair, Alteration, and Rerating of In-Service Piping Systems, Alteration of Piping Systems," First Edition, June 1993; Third Edition

5 Attach a summary of the document incorporated by reference, including publication date and a copy of the cover page.

6 Document available for inspection at the following location:  
Department of Environmental Quality, Petroleum  
Program, 629 East Main Street, Richmond, VA 23219  
(mailing: P.O. Box 1105, Richmond, VA 2318)

7 Copy of referenced document may be procured from:  
API, 1220 L Street, NW, Washington, DC 20005-4070  
www.api.org, 202-682-8000

8 Exemptions Claimed Under (Specific Reference):  
Administrative Process Act  
Virginia Register Act  
Virginia Code Commission Regulations Section 3.3 B 5

Request submitted by: Cindy M. Berndt  
Name  
Director, Office of Regulatory Affairs, DEQ 7/29/2013  
Title Date

Approved: Jane Chaffin 8/5/2015  
Registrar of Regulations Date

# Piping Inspection Code: In-service Inspection, Rating, Repair, and Alteration of Piping Systems

Downstream Segment

API 570  
THIRD EDITION, NOVEMBER 2009

## Special Notes

API publications necessarily address problems of a general nature. With respect to particular circumstances, local, state, and federal laws and regulations should be reviewed.

Neither API nor any of API's employees, subcontractors, consultants, committees, or other assignees make any warranty or representation, either express or implied, with respect to the accuracy, completeness, or usefulness of the information contained herein, or assume any liability or responsibility for any use, or the results of such use, of any information or process disclosed in this publication. Neither API nor any of API's employees, subcontractors, consultants, or other assignees represent that use of this publication would not infringe upon privately owned rights.

Classified areas may vary depending on the location, conditions, equipment, and substances involved in any given situation. Users of this publication should consult with the appropriate authorities having jurisdiction.

Users of this publication should not rely exclusively on the information contained in this document. Sound business, scientific, engineering, and safety judgement should be used in employing the information contained herein.

API is not undertaking to meet the duties of employers, manufacturers, or suppliers to warn and properly train and equip their employees, and others exposed, concerning health and safety risks and precautions, nor undertaking their obligations to comply with authorities having jurisdiction.

Information concerning safety and health risks and proper precautions with respect to particular materials and conditions should be obtained from the employer, the manufacturer or supplier of that material, or the material safety datasheet.

API publications may be used by anyone desiring to do so. Every effort has been made by the Institute to assure the accuracy and reliability of the data contained in them; however, the Institute makes no representation, warranty, or guarantee in connection with this publication and hereby expressly disclaims any liability or responsibility for loss or damage resulting from its use or for the violation of any authorities having jurisdiction with which this publication may conflict.

API publications are published to facilitate the broad availability of proven, sound engineering and operating practices. These publications are not intended to obviate the need for applying sound engineering judgment regarding when and where these publications should be utilized. The formulation and publication of API publications is not intended in any way to inhibit anyone from using any other practices.

Any manufacturer marking equipment or materials in conformance with the marking requirements of an API standard is solely responsible for complying with all the applicable requirements of that standard. API does not represent, warrant, or guarantee that such products do in fact conform to the applicable API standard.

All rights reserved. No part of this work may be reproduced, translated, stored in a retrieval system, or transmitted by any means, electronic, mechanical, photocopying, recording, or otherwise, without prior written permission from the publisher. Contact the Publisher, API Publishing Services, 1220 L Street, NW, Washington, DC 20005.

## Foreword

Nothing contained in any API publication is to be construed as granting any right, by implication or otherwise, for the manufacture, sale, or use of any method, apparatus, or product covered by letters patent. Neither should anything contained in the publication be construed as insuring anyone against liability for infringement of letters patent.

Shall: As used in a standard, "shall" denotes a minimum requirement in order to conform to the specification.

Should: As used in a standard, "should" denotes a recommendation or that which is advised but not required in order to conform to the specification.

This document was produced under API standardization procedures that ensure appropriate notification and participation in the developmental process and is designated as an API standard. Questions concerning the interpretation of the content of this publication or comments and questions concerning the procedures under which this publication was developed should be directed in writing to the Director of Standards, American Petroleum Institute, 1220 L Street, NW, Washington, DC 20005. Requests for permission to reproduce or translate all or any part of the material published herein should also be addressed to the director.

Generally, API standards are reviewed and revised, reaffirmed, or withdrawn at least every five years. A one-time extension of up to two years may be added to this review cycle. Status of the publication can be ascertained from the API Standards Department, telephone (202) 682-8000. A catalog of API publications and materials is published annually by API, 1220 L Street, NW, Washington, DC 20005.

It is the intent of API to keep this publication up to date. All piping system owners and operators are invited to report their experiences in the inspection and repair of piping systems whenever such experiences may suggest a need for revising or expanding the practices set forth in API 570.

This edition of API 570 supersedes all previous editions of API 570, *Piping Inspection Code: Inspection, Repair, Alteration, and Rating of In-service Piping Systems*. Each edition, revision, or addenda to this API Code may be used beginning with the date of issuance shown on the cover page for that edition, revision, or addenda. Each edition, revision, or addenda, to this API standard becomes effective six months after the date of issuance for equipment that is rerated, reconstructed, relocated, repaired, modified (altered), inspected, and tested per this standard. During the six-month time between the date of issuance of the edition, revision, or addenda and the effective date, the user shall specify to which edition, revision, or addenda, the equipment is to be, rerated, reconstructed, relocated, repaired, modified (altered), inspected and tested.

Suggested revisions are invited and should be submitted to the Standards Department, API, 1220 L Street, NW, Washington, DC 20005, [standards@api.org](mailto:standards@api.org).

	Page
1 Scope .....	1
1.1 General Application .....	1
1.2 Specific Applications .....	1
1.3 Fitness-For-Service and Risk-Based Inspection .....	2
2 Normative References .....	2
3 Terms, Definitions, Acronyms, and Abbreviations .....	4
3.1 Terms and Definitions .....	4
3.2 Acronyms and Abbreviations .....	13
4 Owner/User Inspection Organization .....	14
4.1 General .....	14
4.2 Authorized Piping Inspector Qualification and Certification .....	14
4.3 Responsibilities .....	15
5 Inspection, Examination, and Pressure Testing Practices .....	17
5.1 Inspection Plans .....	17
5.2 Risk-Based Inspection .....	18
5.3 Preparation for Inspection .....	20
5.4 Inspection for Types and Locations of Damage Modes of Deterioration and Failure .....	21
5.5 General Types of Inspection and Surveillance .....	22
5.6 CMLs .....	27
5.7 Condition Monitoring Methods .....	29
5.8 Pressure Testing of Piping Systems—General .....	31
5.9 Material Verification and Traceability .....	33
5.10 Inspection of Valves .....	33
5.11 In-service Inspection of Welds .....	34
5.12 Inspection of Flanged Joints .....	35
5.13 Inspection Organization Audits .....	36
6 Interval/Frequency and Extent of Inspection .....	36
6.1 General .....	36
6.2 Inspection During Installation and Service Changes .....	37
6.3 Piping Inspection Planning .....	37
6.4 Extent of Visual External and CUI Inspections .....	40
6.5 Extent of Thickness Measurement Inspection .....	41
6.6 Extent of Small-bore, Auxiliary Piping, and Threaded-connections Inspections .....	41
6.7 Inspection and Maintenance of Pressure-relieving Devices (PRD) .....	42
7 Inspection Data Evaluation, Analysis, and Recording .....	44
7.1 Corrosion Rate Determination .....	44
7.2 MAWP Determination .....	45
7.3 Required Thickness Determination .....	46
7.4 Assessment of Inspection Findings .....	46
7.5 Piping Stress Analysis .....	47
7.6 Reporting and Records for Piping System Inspection .....	48
7.7 Inspection Recommendations for Repair or Replacement .....	50
7.8 Inspection Records for External Inspections .....	50
7.9 Piping Failure and Leak Reports .....	51
7.10 Inspection Deferral or Interval Revision .....	51
